jQuery 1.3 Cheat Sheet

Core				
jQuery Functio	n RETURNS			
\$(expr, [context])	jQuery			
\$(html, [owner])	jQuery			
\$(elems)	jQuery			
\$(<i>func</i>)	jQuery			
jQuery Object Acce	ssors			
PROPERTY	RETURNS			
selector 1	String			
context ¹	Element			
length	Number			
FUNCTION SIZE()	RETURNS Number			
eq(<i>index</i>)	jQuery			
get()	Array <element></element>			
get(index)	Element			
index(<i>element</i>)	Number			
each(func)	jQuery			
1) New in jQuery 1.3				
Data Function	RETURNS			
data(<i>name</i>)	Object			
data(name, value)	jQuery			
removeData(name)	jQuery			
queue(<i>name</i>)	Array <function></function>			
queue(name, func)	jQuery			
queue(name, queue)	jQuery			
dequeue(<i>name</i>)	jQuery			
Plugins				
\$.fn.extend(object)	RETURNS jQuery			
\$.extend(object)	jQuery			
Interoperability	, ,			
FUNCTION	RETURNS			
\$.noConflict()	jQuery			
\$.noConflict(extreme)	jQuery			

	Sele	ectors	
Basic	RETURNS	Attribute Filters	RETURNS
SELECTOR *	Array <element></element>		Array <element></element>
#id	Array <element></element>	[attr=value] ²	Array <element></element>
name	Array <element></element>	[attr!=value] ²	Array <element></element>
.class	Array <element></element>	[attr^=value] 2	Array <element></element>
selector1, selectorN	Array <element></element>	[attr\$=value] ²	Array <element></element>
Hierarchy		[attr*=value] ²	Array <element></element>
SELECTOR	RETURNS	[attr1][attr2][attrN] ²	Array <element></element>
ancestor descendant	Array <element></element>	2) The [@attr] style selectors were removed in jQuery 1.3	
parent > child	Array <element></element>	Child Filters	
previous + next	Array <element></element>	SELECTOR :nth-child(index even odd	RETURNS
previous ~ siblings	Array <element></element>	equation)	Array <element></element>
Basic Filters		:first-child	Array <element></element>
SELECTOR	RETURNS	:last-child	Array <element></element>
:first	Array <element></element>	:only-child	Array <element></element>
:last	Array <element></element>	Forms	
:not(selector)	Array <element></element>	SELECTOR	RETURNS
:even	Array <element></element>	:hidden	Array <element></element>
:odd	Array <element></element>	:input	Array <element></element>
:eq(<i>index</i>)	Array <element></element>	:text	Array <element></element>

Attributes				
Attr	RETURNS			
attr(<i>name</i>)	Object			
attr(props)	jQuery			
attr(key, value func)	jQuery			
removeAttr(name)	jQuery			
Class				
FUNCTION hasClass(class)	R≞turns Boolean			
addClass(<i>class</i>)	jQuery			
removeClass([class])	jQuery			
toggleClass(<i>class</i>)	jQuery			
toggleClass(class, switch)	jQuery			
HTML				
FUNCTION	RETURNS			
html()	String			
html(value)	jQuery			
Text				
FUNCTION	RETURNS			
text()	String			
text(value)	jQuery			
Value				
FUNCTION	RETURNS			
val()	String, Array			
val(<i>value</i>)	jQuery			

Manipulation	
Insert Inside	
FUNCTION	RETURNS
append(<i>content</i>)	jQuery
appendTo(selector)	jQuery
prepend(content)	jQuery
prependTo(selector)	jQuery
Insert Outside	RETURNS
after(content)	jQuery
before(content)	jQuery
insertAfter(content)	jQuery
insertBefore(content)	jQuery
Insert Around	05710110
wrap(html element)	returns jQuery
wrapAll(html element)	jQuery
wrapInner(html elem)	jQuery
Replace	
replaceWith(content)	RETURNS
1 7	jQuery
replaceAll(selector)	jQuery
Remove	
FUNCTION	RETURNS
empty()	jQuery
remove([expr])	jQuery
Сору	
clone([events])	RETURNS jQuery

:selected	Array <element></element>					
Traversing						
Filtering	RETURNS					
filter(expr)	jQuery					
filter(func)	jQuery					
is(<i>expr</i>)	Boolean					
map(<i>func</i>)	jQuery					
not(<i>expr</i>)	jQuery					
slice(start, [end])	jQuery					
Finding						
add(expr)	R≣TURNS jQuery					
children([expr])	jQuery					
closest([expr])	jQuery					
contents()	jQuery					
find(<i>expr</i>)	jQuery					
next([expr])	jQuery					
nextAll([expr])	jQuery					
prev([expr])	jQuery					
prevAll([expr])	jQuery					
offsetParent()	jQuery					
parent([<i>expr</i>])	jQuery					
parents([expr])	jQuery					
siblings([expr])	jQuery					
Chaining						
andSelf()	returns jQuery					
end()	iQuery					
enu()	Jeuery
